EXPERIENCE

Junior Software Developer

Meshed Group

07/2024 - 01/2025 Remote

- Developed and maintained software features for the Meshed 360 platform, focusing on backend enhancements and front-end improvements.
- Conducted software maintenance and troubleshooting on Meshed 360 modules.
- Performed testing, debugging, and performance tuning to ensure software reliability and efficiency.

English Teacher

Talking Club Academy

06/2021 - 07/2023 South Korea

- Taught English in South Korea to mainly elementary students.
- A rigid syllabus was followed.
- Other duties included administrative responsibilities and report cards.

Program Specification Specialist

Sundays River Citrus

04/2020 - 05/2021 Kirkwood, South Africa

- Utilized CMS system to ensure specifications and volume are adhered to as required by the markets.
- Executed packing programs.
- Ensured that role players are informed of the status of packing.
- Facilitated time effective change-overs.

Teacher

EBY Talking Club

10/2018 - 10/2019 South Korea

- I taught English for elementary, middle school and adult students in South Korea.
- My responsibilities included teaching, administrative duties, report cards and the listening parts of TOEFL.

Inspector

FQMS

04/2018 - 10/2018 South Africa

- Checking quality of fruit in pack houses throughout the Langkloof for Tru-Cape.
- Generating reports and databases on quality inspections.
- Auditing the program specifications for SRCC in the Kirkwood and Addo area.

Quality Control Manager

Courageous Cat / UFF Old Mutual Agri-Investment

11/2017 - 04/2018 Location

- Fruit quality standards fulfillment and monitoring samples.
- Creating databases to combat claims from buyers and exporters.
- Assisting the line manager with pack machine and operations.
- Logistic databases on daily pack out.
- Conducting a quality report daily.

Software Development

CodeSpace Academy

08/2023 - 04/2024 Remote

LANGUAGES

Afrikaans

Native

English

Proficient

SUMMARY

I am an entry-level Software Developer.

I worked as a Software Developer at Meshed360, where I expanded my skills in a real-world development environment. This experience has strengthened my understanding of development practices and allowed me to build my knowledge of C#, ASP.NET, and MS SQL in a practical setting. I am eager to continue growing and to contribute meaningfully to any project or team.

I completed a certificate in Software Development at CodeSpace Academy. Furthermore, I have also completed many courses on Udemy and plan to continue expanding my knowledge through learning and practical application. My studies have prepared me to be able to learn rapidly, and I am committed to learning new technologies and languages.

I earned my B.A. in Communication Science with a focus on Media Studies and Journalism in 2015 from the University of the Free State. After university, I worked in the fruit industry and also taught English as a foreign language.
